EDUCATION

Harbin Institute of Technology (Shenzhen) — *C9, Project 985/211, QS 2026: 256* Sep 2024 – Mar 2027
Master of Industrial Design, Future Design School
Advisor: [Assoc. Prof. Qingchuan Li](#)
Rank: **3/62** Weighted Average: **92.04/100**

University of Science and Technology Beijing — *Project 211, QS 2026: 480* Sep 2020 – Jun 2024
Bachelor of Industrial Design, School of Mechanical Engineering
Advisor: [Prof. Xiaohui Wang](#)
Rank: **2/48** GPA: **3.88/4.0**

RESEARCH INTERESTS

Human-AI Co-Creation, with interests in how designers and end users work with GenAI to develop ideas, refine intentions, retain control, and create personalized or creative outcomes;
GenAI-Mediated Interactive Art, with a focus on symbolic expression, multimodal storytelling, reflective experiences, and audience participation;
Artistic Visualization of Data and Archives, exploring how artistic visualization can represent and communicate archival materials and cultural heritage through expressive and experiential forms.

PUBLICATIONS

Research Papers

- [R01] **Lingyu Peng**, Yuanlinxi Li, Bai Xue, Zihang Zhang, and Qingchuan Li. Exploring Design Tensions in Human-AI Co-Creation in Cultural and Creative Design: A Case Study of Yanchuan Patchwork. (*International Journal of Human-Computer Interaction (JCR Q1, IF=4.9)*, 2026.)
- [R02] **Lingyu Peng**, Yuanlinxi Li, Bai Xue, Jiabin Zhang, and Qingchuan Li. Roles and Contributions of Cultural Heritage Professionals in AI-Assisted Cultural Heritage Design Workflows: A Case Study of Yanchuan Patchwork. (In *Culture and Computing, HCII 2025*, Lecture Notes in Computer Science (LNCS 15800), Springer, Cham, 2025.)
- [R03] Xingyu Lan, Yifan Wang, **Lingyu Peng**, and Xiaofan Ma. More Than Beautiful: Exploring Design Features, Practical Perspectives, and Implications of Artistic Data Visualization. (*IEEE Pacific Visualization Conference (PacificVis)*, 2025. **Best Paper Award**.)
- [R04] Yu Song, Xiaosong Qian, **Lingyu Peng**, Zihan Ye, and Jingyan Qing. Cultural and Creative Design of AIGC Chinese Aesthetic. (*Packaging Engineering*, 44(24), 2023. *Chinese core journal; CNKI composite IF=2.948*.)

Art Papers

- [A01] **Lingyu Peng**, RAY LC, Yuhao He, and Qingchuan Li. Reflecting on Future Human-AI Society through *Along the River During the Qingming Festival*. (Forthcoming in *SIGGRAPH Asia 2026 Art Papers*.)
- [A02] **Lingyu Peng**, Wenbo Lu, Liying Long, and Qingchuan Li. Ink Spiral: Symbolic Transformation from *The Thinker* to the *Four Gentlemen*. (Forthcoming in *ACM Multimedia 2026, Interactive Art*.)
- [A03] **Lingyu Peng**, Yu Liang, Ying Zhang, Chang Ge, and Qingchuan Li. COSMIC 1001: Engaging Future Speculation on Space Exploration with Generative AI. (Forthcoming in *ACM Multimedia 2026, Interactive Art*.)
- [A04] **Lingyu Peng**, Chang Ge, Liying Long, Xin Li, Xiao Hu, Pengda Lu, Qingchuan Li, and Jiangyue Wu. Tides of Memory: Digital Echoes of Netizen Remembrance. (*IEEE VIS Arts Program (VISAP)*, 2025.)

Under Review / Revision

- [U01] Yuanlinxi Li, **Lingyu Peng**, and Qingchuan Li. Chasing Clouds: Effects of Guidance Modes, Metaphorical Mapping, and Wind Haptic Feedback on VR Breathing Training Effectiveness and User Experience. (Major revision invited at *International Journal of Human-Computer Studies (JCR Q1, IF=5.1)*, 2026.)
- [U02] **Lingyu Peng**, Yu Liu, Yuhao He, Jingao Guo, and Qingchuan Li. Manuscript on End-User Vibe Coding for Personalized Self-Tracking Systems. (Under review at *ACM CHI 2027*.)

EXHIBITIONS & ARTWORKS

Tides of Memory: Digital Echoes of Netizen Remembrance <i>IEEE VIS Arts Program (VISAP) Artworks</i> Lead Artist and First Author; interaction concept, technical implementation, exhibition production.	Nov 2025
Future1001: Design of a Future Predictive Interaction Installation Based on GenAI <i>The 21st China (Shenzhen) International Cultural Industries Fair</i> Lead Artist and First Author; interaction concept, system design, technical development.	May 2025
Mo Yun Shan Shui: An Interactive Art Installation Inspired by the Rhythm of Landscape Ink Painting <i>Chinese CHI 2024 Art Gallery</i> Lead Artist and First Author; interactive concept, visual design, technical development.	Nov 2024

RESEARCH PROJECTS

Interdisciplinary Human-AI Co-Creation Mechanisms for AIGC-Empowered Intangible Cultural Heritage Design <i>Key Contributor</i> <i>Harbin Institute of Technology (Shenzhen); Advisor: Assoc. Prof. Qingchuan Li</i> <i>Funded by the Guangdong Featured Innovation Project in Higher Education</i> - Annotated a 92-image Yanchuan Patchwork dataset from 117 images to support LoRA fine-tuning for workshops. - Designed protocols and led 2 design workshops (Xi'an and Shenzhen), 4 focus groups, and 12 expert interviews to surface design tensions in human-AI co-creation. - Applied the Design Tensions Framework to synthesize workshop outputs and interaction data into a scenes-issues-tensions knowledge framework. - Used Activity Theory to structure labeling results into a knowledge base for RAG that powered a reflective collaborative bot in cultural and creative design workflows. <i>Related Publications: HCII 2025; IJHCI 2026.</i>	Oct 2024 – Present
Design Features and Practical Perspectives of Artistic Data Visualization <i>Contributor</i> <i>Fudan University; Advisor: Assoc. Prof. Xingyu Lan</i> <i>Funded by National Natural Science Foundation of China</i> - Participated in constructing a corpus of 220 artistic data visualizations from VISAP and snowball sampling. - Performed open coding on design paradigms, intents, and techniques; conducted case analysis of 30 selected works and contributed to the coding framework and taxonomy through team discussions. - Contributed to the design of semi-structured interview protocols, conducted and transcribed 3 artist interviews. - Designed the project website interface to disseminate the corpus and research findings. <i>Related Publication: PacificVis 2025 (Best Paper Award).</i>	Jul 2023 – Oct 2023

WORK EXPERIENCE

Instructor, Graphic Creativity Shenzhen University of Information Technology Taught a graphic creativity course focused on integrating GenAI with visual rhetoric to create conceptually expressive and visually compelling poster designs.	Apr 2026 – Jun 2026 <i>Shenzhen, China</i>
Instructor, Interaction Design Shenzhen University of Information Technology - Designed and taught a full interaction design course for 2 classes with 60+ students across a 14-week semester. - Developed 16 lesson plans (30,000+ words), 424+ presentation slides, and course assessment materials. - Taught UX/UI design through a digital transformation project with GenAI for Shenzhen Dongmen Old Street. - Received an A-level teaching evaluation.	Aug 2025 – Jan 2026 <i>Shenzhen, China</i>
Design and Creativity Intern Beijing CAT Gallery Culture & Technology Co., Ltd. - Applied GenAI to generate concepts, images, and videos for Palace Museum, contributing to 3 product designs. - Surveyed text-to-image, image-to-model, and image-to-video GenAI tools to formulate creative proposals.	Jun 2023 – Aug 2023 <i>Beijing, China</i>

- Contributed approximately 5,000 words to the project book and prepared presentation slides and video materials for project delivery.

OTHER PROJECTS

Zotero Highlight Collector2026

Independent Open-Source Project★ 40 GitHub Stars

- Developed a Zotero plugin that transforms PDF highlights into structured research records by mapping highlight colors to categories such as core claims, methods, quotations, conclusions, and ideas.
- Designed workflows for collecting annotation text and source metadata, filtering records, and exporting data to CSV and Anki-compatible formats.
- Built the tool around a local-first architecture to support privacy-preserving academic reading and literature synthesis.

Smart Health Necklace: Binocular Vision for Dietary Intake and Nutrition EstimationApr 2026 – Jun 2026

Startup Team Member; Lead: Xiaofeng Zhang

A wearable health device using binocular vision to estimate food intake volume and nutritional composition.

- Conducted market research on vision-based health tracking devices and smart wearables, focusing on sensing methods, interaction patterns, and product positioning.
- Designed the AI health companion’s personality, tone of voice, and conversational style, and defined boundaries for AI intervention in health-related interactions.
- Designed interaction strategies for food capture and feedback, including voice-notification triggers and transitions between passive and intentional image capture.
- Designed the product’s exterior appearance and visual form language to align the wearable device with its health-companion identity and interaction experience.

ACC Interactive Exhibition Design and CoordinationAug 2026 – Present

Exhibition Team Member; Lead: Ray LC

An interactive exhibition project developed in collaboration with Asia Culture Center (ACC).

- Coordinated communication between the project team and ACC on venue requirements, installation constraints, equipment, and exhibition logistics.
- Participated in spatial planning, focusing on projector placement, projection coverage, visitor circulation, and entrance dimensions.
- Designed prompts and conversational outputs for nine AI identity devices, defining how each identity communicates within the exhibition narrative.

HONORS & SCHOLARSHIPS

National Scholarship	Ministry of Education of China	2023, 2025
Special Scholarship (Top Award)	Harbin Institute of Technology	2024, 2025
Provincial Merit Student	Heilongjiang Province	2025
Outstanding Undergraduate Thesis	Beijing Municipality	2024
Outstanding Graduate	University of Science and Technology Beijing	2024
People’s Scholarship	University of Science and Technology Beijing	2022, 2021

SELECTED DESIGN AWARDS

Silver Award	ChinaVis Data Visualization Competition, Art Visualization Track	2025
First Prize	NCDA Future Designer Awards, National Final	2025
Bronze Award	ChinaVis Data Visualization Competition, Art Visualization Track	2024
Top 4 Finalist	Torch Design Competition for the 9th Asian Winter Games Harbin	2024
First Prize	Beijing Universities Industrial Design Competition; selected as outstanding work for publication	2023
Finalist	ChinaVis Data Visualization Competition, Art Visualization Track	2023

SKILLS & INTERESTS

Languages	Chinese (Native), English (IELTS 6.5, all bands 6.0+)
Programming & Technical	Three.js, TouchDesigner, Arduino, Processing
Research & Analysis Tools	LaTeX, SPSS
Design Tools	Figma, Adobe Illustrator, Photoshop, SolidWorks, KeyShot
